Ship Creek Moose Permit (RM435) to be Issued Online

(Anchorage) –Registration moose permits for the Ship Creek drainage in Unit 14C (RM435) will be available online **starting at 8:00 AM on Tuesday, October 5, 2021** to the first 100 qualified hunters that register. The RM435 moose permit is a limited registration permit normally issued on a first-come first-serve basis at the Anchorage ADF&G office. Due to ongoing concerns regarding Covid-19, permits will be available **online only** at www.hunt.alaska.gov. Permits will not be available in-person at the Anchorage ADF&G office.

The permit is open to any qualified Alaska resident or non-resident and is non-transferable. Season dates are October 25 – November 30, 2021; however, the hunt will be closed by emergency order when the harvest quota is reached. Interested hunters should be aware that access to the hunt area is limited and the terrain is extremely demanding.

Hunters should stay aware of any current municipal or state health mandates when reporting in-person to the Anchorage or Palmer ADF&G office within 3 days of killing a bull moose with the required 5-inch section of the lower jaw.

For specific details of the RM435 any bull moose registration permit, please visit the following link:

DM446 DM447 RM435 Moose Drawing and Registration Permit Hunt

This map is intended for hunt planning use, not for determining legal property or regulatory boundaries. Content is compiled from various sources and is subject to change without notice. See current hunting regulations for written descriptions of boundaries. Hunters are responsible for knowing the land ownership and regulations of the areas they intend to hunt.

AREA DESCRIPTION: Unit 14C, that portion of Unit 14C within the drainage of Ship Creek above the JBER boundary, excluding the Togle Creek drainage.

Please refer to the Alaska Hunting Regulations booklet for bag type, seasons, and additional regulations concerning this hunt.
